

AEG INVERTERCONTROL MONITORING APP

Monitor the performances of your AEG solar inverter and power plant in real time

1 - WHAT IS AEG INVERTERCONTROL?

AEG InverterControl is an app allowing you to monitor your AEG solar inverter and solar plant performances in real time, including energy yields, CO₂ emissions, income and further data that are crucial to understanding your solar installation's functioning and profitability. By displaying alarms and fault information, AEG InverterControl further provides you a reliable insight into the equipment status and allows for greater control and easier plant maintenance. Detailed and understandable reports provide an effective assessment of the performances of your power plant.

2 - WHICH OPERATING SYSTEMS / DEVICES DOES IT SUPPORT?

AEG InverterControl is, at the time of writing, available for Android 2.3 or later and iOS 8.1 or later. It can be installed on a large range of mobile devices (smartphone and tablets).

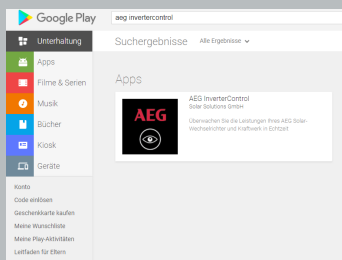

3 - WHERE CAN I DOWNLOAD IT?

For Android devices

Click here to download:

Or simply access Google Play Store from your smartphone / tablet and digit "AEG InverterControl" in the Search field.

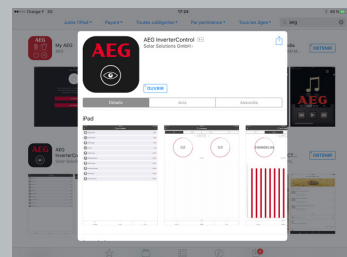

For Apple devices (iOS)

Click here to download:

Or simply access the Mac App Store from your iPhone / iPad and digit "AEG InverterControl" in the Search field.
